

# What is a Caster Positioning Safety-Set?

Caster positioning safety-sets allow kitchen cooking appliances to be properly positioned under the hood fire suppression system so that a fire would be effectively extinguished by the sprinkler nozzle and meet National Fire Protection Association (NFPA) requirements.

- NFPA 96  
12.1.2.3.1 An approved method shall be provided that will ensure that the appliance is returned to an approved design location [after moving for cleaning or maintenance].

Available for purchase at local restaurant supply stores.
