

Anything that mixes with rain becomes stormwater pollution!

For that reason, it is important to dispose of HHW properly.

Dumping common household chemicals down storm drains, pouring them on the ground, or putting them in the trash can dramatically affect the health of our local waterways.

Runoff from rain, snow melt and sprinklers washes chemicals on the ground into streams, rivers and lakes untreated. This can cause contamination of our drinking water and harm recreation areas.

One quart of oil can affect an area the size of three football fields and one gallon of oil can pollute 250,000 gallons of water!

Only Rain Down the Drain!

For more information on **HazMat and HazWaste:**

JBER Hazardous Waste Center
JBER-E Building 4314 (contractor operated) at **907-552-3435** or

JBER Hazardous Waste
Program Manager (673d CES/CEIEC) at **907-384-3322**

More Info and Links

MOA, "How Do I dispose of These Items?" <http://www.muni.org/Departments/SWS/HowDoI/Pages/dispose.aspx>

PCSing? Only two options for HHW on JBER: Give it to someone who can use it or Dispose of it at ARL. AD Army cardholders can drop off 40 pounds for free (up to 200 pounds per calendar month) at the ARL. Extra weight per day or month will be charged regular ARL fees.

If found illegally dumping HHW, including leaving HHW at the JBER Thrift Stores, you may be held liable.

Household Hazardous Waste

Military Housing Tenants

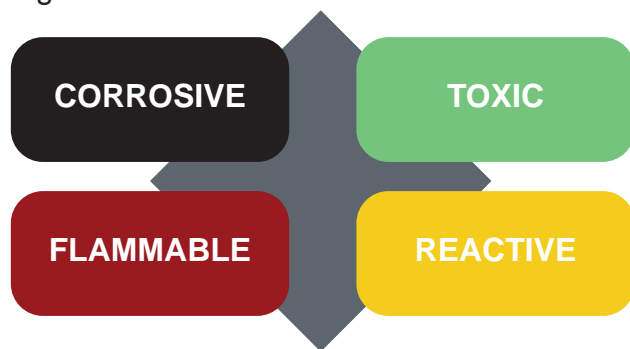

JOINT BASE ELMENDORF-RICHARDSON

What is Household Hazardous Waste (HHW)?

Leftover household products that contain **corrosive**, **toxic**, **flammable**, or **reactive** ingredients are considered HHW.

These materials can include:

Automotive products (antifreeze, fluids, motor oil, oil filters, gasoline, etc.)

Batteries (home and vehicle)

Electronics

Fluorescent light bulbs and compact fluorescent lamps (CFLs)

Household cleaners (ammonia, drain cleaner, rust remover, etc.)

Paint products (oil-based paint, latex paint, spray paint, caulk, wood stain, etc.)

Garden chemicals (pesticides, herbicides, fertilizers, insecticides)

Anchorage Solid Waste Services

Call 907-428-1742 or 907-343-6262

Hazardous Waste Collection Center: Anchorage Regional Landfill (ARL)

15500 E. Eagle River Loop Road

Hours of Operation

Tues through Sat 0800 to 1700

The HHW Collection Facility: Central Transfer Station (CTS)

1111 E. 56th Avenue

Hours of Operation

Tues, Thurs, and Sat 0800 to 1700

Accepted Waste Types

Household Products

cleaners, aerosols, solvents, pest control

Paint Products

paint, stain, varnish, thinner and adhesives

Outdoor Products

pesticides, herbicides, fertilizers

Auto Products

fuel, motor oil, filters, cleaners, solvents, antifreeze, fluids, batteries

ARL does not accept these Waste Types:

**Ammunition/Explosives, Asbestos,
Smoke Alarms, Pharmaceuticals and
Medication**

See MOA Waste link (on reverse)

for more information

Reduction at Home

Check the label before you buy. If you see a cautionary notice, this material will become HHW if not used properly.

Use the product as the manufacturer instructs. Companies test their products to comply with federal regulations. Directions must be followed to get maximum benefit from the products without compromising safety.

Buy only what you need. Surprisingly, some products cost more to dispose than they do to purchase. Using forethought when purchasing these products may save your community the cost of disposing of them as HHW.

Store products safely. Children, pets, and others may injure themselves when products are not safely stored. Make sure potential HHW is stored out of harm's way.

Pharmaceuticals and Medication

Do not flush or wash down the drain! Anchorage Water and Wastewater Utility's wastewater treatment facilities are not designed to remove pharmaceuticals and medications.

Drop-off Locations for Pharmaceuticals:

JBER Hospital Pharmacies

Collection Bins at both locations
